XCT technology with cross-correlation—won't leave you in the dark

Lutron sensors detect fine motion, like reading a book, better than other PIR sensors.

Breakthrough sensing technology ensures lights stay on when a room is occupied and off when it's not.

<p>✓ Major Motion</p>  <p>Person walking 3 feet</p>	<p>✓ Minor Motion</p>  <p>Movements like extending your arm</p>	<p>✓ Fine Motion</p>  <p>Small movements like flipping pages of a book</p>	<p>✓ No False-On</p>  <p>Lights stay off when room is unoccupied</p>

✓ **Very fine motion**

XCT technology now available for dual-technology sensors. Dual-technology sensors use PIR and ultrasonic technologies together for maximum sensitivity.

Minimal movements like typing on a keyboard

Durable design with modern, clean aesthetic

Lutron sensors are engineered with robust components, combined with award-winning design.

Multi-location dimmers/switches work with up to nine companion dimmers/switches, unless RF models, which work with Pico remote controls

3-way dimmers work with mechanical 3-way switches, unless RF models, which work with Pico remote controls

Vacancy-only models available. Replace the "O" in the model number with a "V", or for dual-tech or 0-10V vacancy models, add -V- before color code (XX)

For dual-tech sensors, only neutral optional models allow for 3-way or multi-location applications
